

INTRODUCTION

In late July 2007, the California Department of Corrections and Rehabilitation (CDCR) and Kitchell contracted with the team of PSA Dewberry and Chinn Planning, Inc. to develop a Conceptual Program Plan and Design for a 500 Bed Secure Reentry Facility. Assembly Bill 900, also known as the Public Safety and Offender Rehabilitation Services Act of 2007, provided funding for 16,000 beds in Secure Reentry Facilities to be located in communities throughout California. These facilities, which will be no larger than 500 beds, will provide offenders with job training, education, mental health and substance abuse counseling, housing assistance, and other programs that are critical to successful reentry into their local communities.

Programs will be delivered in a therapeutic environment, and will reflect evidence based approaches to successful reentry and reintegration programming. Because each community has differing needs for their reentry facility, programs and services will be developed to specifically address the needs of those communities. Some communities may desire smaller facilities, or may elect to provide support services (example- Food Service) from existing facilities in the community. As each community plans for their reentry facility, the Conceptual Program Plan for a 500 Bed Secure Reentry Facility presented in this report will serve as the conceptual guideline for development of secure reentry facilities that meet the needs of each jurisdiction.

The Consultant Team met several times with members of a Project Advisory Committee composed of representations of CDCR to provide direction and input into the development of the Conceptual Program Plan. Members of the Consultant Team and Project Advisory Committee included:
